Sales Performance Report (Q1 2023)

Overview This report presents an analysis of sales performance across brands, regions, customer demographics and product categories for **Q1 2023** (January to March). A total of **250** customers generated 15,657 orders, producing a total revenue of **£3,106,350**, with a total cost of **£2,174,445** and a total profit of **£931,905**.

Brand Performance Apple emerged as the most profitable brand with **£196,890** in profit , followed by Lenovo **(£160,140)** and Samsung **(£159,510)**. HP, Asus and Dell recorded comparatively lower profits, with Dell lowest at **£125,850**. This suggests that premium brands command higher margins and customer preference leans towards well established names in the market.

Monthly Orders Order volume was steady across the quarter, with **5,180** orders in February, **5,236** in January and **5,241** in March. The differences between months are small, so the data shows no clear trend over **Q1**.

Color Preference White was the most purchased product color, followed by Gray and then Black. This could inform future inventory and product selection decisions.

Income Level & Profit Medium income customers contributed the most to overall profit **(£346,920)**, followed by High income **(£302,205)** and Low income **(£282,780)** customers. The three groups are fairly close, so marketing could be tested across all of them, with medium income customers as a reasonable starting point.

Revenue by Gender Female customers generated **£2,077,700** (67% of total revenue) and male customers generated **£1,028,650** (**33%**).

Customer Demographics The customer base consists of **250** customers spread across four regions (East, South, West and North). The age range of customers falls between **25** and **40** years, with an average age of **33**, indicating a predominantly young adult customer base.

Recommendations

- **Focus on Apple and Lenovo :** these brands drive the most profit and should be prioritized in stock and marketing.
- **Keep White and Gray in stock :** given their popularity, strong availability in these colors could drive more sales.
- **Review the gender mix :** female customers generate about two thirds of revenue, so check whether this comes from more customers or higher spend before targeting campaigns.
- **Monitor monthly orders :** volume was steady in **Q1**, so track it over a longer period before planning promotions
- **Regional strategy :** use the Region slicer to find the region that generate the most revenue and allocate more marketing budget there.
